

Pfizer Zero Cost Prescription Drug List

This list highlights the prescription drugs that are covered at 100 percent under Pfizer sponsored prescription drug plans for colleagues and retirees. To ensure 100 percent coverage, remember to always show your prescription drug ID card when having your prescriptions filled and ask your physician to write the prescription in a no-substitution format by checking the “do not substitute” box at the bottom of the prescription. Additionally, if you are being prescribed a generic that is manufactured by more than one drug company ensure that you are asking the pharmacy to fill the prescription with a Pfizer or Greenstone product.

This list is subject to change as new medications are added and some are removed.

Alzheimer’s Disease

Aricept

Anti-Asthmatic

Intal

Tilade

Anti-Convulsants

Celontin
